

The English House (ENGH) – Litepaper

Version: 1.0

Date: April 26, 2025

Overview

The English House (ENGH) is a meme-powered token on Solana, backed by a real 50-cent land plot and a house construction project. ENGH blends humour with utility, offering community engagement, NFTs, and staking rewards, empowering users to support and symbolically own a piece of the house.

Why ENGH stands out

ENGH isn't just a meme token—it's the beginning of something playful, powerful, and personal.

This project invites the community not just to invest—but to live inside a digital story. Imagine owning a token that doesn't just sit in your wallet, but gives you symbolic keys to a room, a space, a vibe—a house. ENGH brings together meme energy and world-building to create a home on the blockchain.

This is a meme you don't just watch. It's one you walk through.

A First in Meme-Age Technology

You haven't seen this before.

ENGH is not just a coin. It's not just another meme. It's the first project of its kind to fuse meme culture, real-world storytelling, and digital ownership in one experience. This isn't a trend—it's a new standard.

A meme coin that symbolises an actual house.

NFTs that represent rooms you can upgrade and explore.

A digital estate with plans to grow across Solana, Ethereum, and BNB.

And a future where owning a token means more than number go up—it means being part of the world's first meme house.

ENGH isn't just part of the meme economy—it's redefining what it can be.

NFT Rewards & Future Auctions

To reward loyal holders and build long-term community engagement, ENGH will distribute free monthly NFTs in the form of symbolic wall bricks.

These bricks will be awarded to the top 100 token holders each month.

Later, when NFT Rooms, Gardens, Museums, or Library spaces are introduced, top holders will gain early or exclusive access to special auctions.

This model strengthens engagement and makes holding ENGH tokens more valuable over time.

KEY FEATURES

- **NFTs:**
 - **Wall Brick NFTs:** Exclusive digital collectibles for the top 100 holders each quarter, representing a brick in the house—tradable on Magic Eden with staking boosts.
 - **Room & Garden NFTs:** Customisable tokens offering governance perks and bonus APY, unlockable as the house nears completion.

- **Staking:** The **Brick Vault** system lets you lock ENGH for 5-15% APY (tiered by duration) + NFT boosts, with rewards distributed weekly from the 1% tax pool.
- **Community Governance:** Vote on house design (e.g., color, layout) and roadmap decisions via Snapshot, with voters earning exclusive NFT badges.
- **Deflationary Burns:** 15% of total supply (150 million ENGH) burned in phases—5% at foundation completion, 10% at house finish—tracked on-chain.
- **Smart Contract Audit:** All smart contracts (token minting, vesting, multisig, liquidity pools) will be audited by a reputable Solana security firm (e.g., Opcodes or Sec3) to ensure no vulnerabilities, providing maximum security for investors and the community.
- **Multisig Security with Vesting:** Team, development, and reserve funds secured in Squads multisig wallets, requiring 3-of-5 signatory approvals to ensure decentralised control and transparency. Additionally, these allocations are subject to vesting schedules via Streamflow to prevent premature distribution:
 - **Team (15%):** 6-month cliff, 1-year linear vesting.
 - **Development (10%):** Vested over house construction phases (e.g., 6-month cliff, 18-month release).
 - **Reserve (5%):** Locked for 1-2 years with no early withdrawal.

TOKENOMICS

- **Total Supply:** 1,000,000,000 ENGH
- **50% Liquidity:** Raydium and meteora ,both locked for 12 months via Team Finance.(A significant additional liquidity pool will be added later to enhance trading volume and market depth, further supporting the project's growth.)
- **20% Marketing/Community:** Airdrops, meme contests (\$5K prize pool), and promotions to ignite hype.
- **15% Team:** 6-month cliff, 1-year linear vesting via Streamflow.
- **10% Development:** Vested over construction phases (6-month cliff, 18-month release).

- **5% Reserve:** Locked for 1-2 years via Squads multisig for future needs (NFTs, utility, CEX listing).
- **Tax:** 1% on buys/sells (50% liquidity, 50% staking rewards), ensuring ecosystem growth.

ROADMAP

- **April 2025:** Token minting via Orion Tools, revoke mint/freeze authorities, set up multisig (Squads).
- **May 2025:** Launch on Solana via Raydium, \$15K initial liquidity, lock LP tokens for 12 months, start airdrop campaign.
- **June 2025:** Finalise house design via community vote, drop Wall Brick NFTs, escalate marketing.
- **Q3 2025:** Launch Brick Vault staking, share construction updates, first 5% burn at foundation milestone, community voting on design.
- **Q4 2025:** Room & Garden NFTs, second burn event post-construction milestone.
- **2026:** Full house completion, 10% burn at house completion, metaverse demo (if feasible), evaluate cross-chain expansion.
